

FIRST EP « On Earth » TO BE RELEASED ON **FEBRUARY 24TH 2016**

N O N S E N S E

**METAL
PROG /
DJENT**
Lyon, Fr

BIOGRAPHY

NONSENSE was created by Sebastien Biola (guitar) in 2012. Simon Digonnet (drums) and Romain Regal (bass) quickly joined the band which found his voice with Olivier Sicaud's wide vocal range. The song-writing process starts when Raph De Stefano (guitar) steps in and the project slowly turns into a progressive metal band flirting with the djent genre.

A first single « Final Flash » was released in May 2014, which got **numerous positive feedbacks from both the media and the audience**, enabling the band to **open for TEXTURES in Lyon** during this same year.

Since then, the band has been taking the time to write this first EP where all their influences, **from modern metal to thrash, to progressive metal**, the whole thing being very well executed and refreshing, are gathered with power and harmony.

« ON EARTH »

Tracklist

1. Virtual Addiction
2. Inertia
3. On Earth
4. The Nonsense

Total duration: 30mn

The NONSENSE guys have a true band vision of their music which they write together in the rehearsal room, taking the time afterwards to make the arrangements they have in mind.

With this EP, mastered by **Jochem Jacobs** (ex-TEXTURES) at Split Second Sound Studio, the band wishes to bring back to the listener, the feeling of a band playing together and voluntarily went for a pretty rough and non-edited sound to underline this approach.
